

ALERTS

Be sure to check alerts and warnings related to weather and road conditions!

Trip Monitoring Service

When hiking or mountain climbing, you can register your travel plan in advance. Trip monitoring allows rescue teams to start search operations if you have not checked out before the registered estimated time of trip completion.

Driving in Iceland

Traffic rules in Iceland are very different to those in Japan so be sure to check the rules in advance when driving.

Outdoors in Iceland

Iceland is full of beautiful nature. However, nature can sometimes become a major threat and fatal accidents have occurred. Be sure to check the appropriate ways to enjoy each activity.

Weather and Road Conditions

The weather in Iceland changes frequently, with sudden heavy rains, heavy snow and strong winds. Also, the road network is not well-developed so if a road becomes blocked, it is not possible to bypass it and you will be stranded. Be sure to check the weather forecast and road conditions before going out.
